VideoCLIP-based Evaluation Metrics for Text-to-Video Generative Tasks

University of British Columbia

Sept. 2022 – Dec. 2022

Vancouver, BC, Canada

- Proposed a VideoCLIP-based evaluation metric for text-to-video generators, dubbed **VCLIP-Metric**, to capture the sequential information in the video and compare its semantic information with the input text. Our results show that the final score is almost twice the existing CLIP frame-based metric.
